

UMOYA HVAC

DESIGN • MANUFACTURE • SUPPLY • INSTALL

We Are A Highly Recommendable HVAC Company

The KZN region has numerous projects out for tender which has attracted many competing parties that puts pressure on us to give out our best price in order to win these tenders with very low profit margins.

With us gaining recognition with major companies ,puts us top of their list for upcoming projects. The introduction of an external sale rep would boost our clientele and marketing fields. Purchasing of new modern machinery to improve our productivity, this will allowing us to put out cheaper selling rate.

Training and skills development should be given to workers to improve their knowledge and skills on various products. Having an office Clerk to do pricing for tenders and also monitoring labor and material cost .

Great Workmanship & Reliable Service Provider

Umoya HVAC is a company of great workmanship, quality and years of experience. We are ever improving our services with customer demands and expectations.

Umoya HVAC is growing at a rapid pace, it has already embarked on huge projects in a short space of time. We give our customer great service and satisfaction with our products.

Our Value Proposition

With the development sector thriving , Umoya HVAC can only grow from strength to strength, with the challenges ahead, and through constant service delivery, and follow through on commitments, Umoya HVAC footing in the market will be cemented.

- Quality standards and certification-ISO Rated-To be formally implemented. Expertise and experience.

Our Services

Our products and Services are utilized in the construction of ventilation systems and are made up of a leading and extremely comprehensive product programme of spiral and rectangular duct elements and details. This leads to shorter installation times, less weight and smaller insulation surfaces, as well as lower energy consumption and air leakages.

Design Its our goal to provide thermal comfort and acceptable indoor air quality. HVAC system design that is a subdiscipline of mechanical engineering, based on the principles of thermodynamics, fluid mechanics and heat transfer. With complete ductwork drafting and calculation. Make revisions that are accounted for throughout the design.

Installations We have had extensive experience in specialised installations such as the numerous hospitals we have completed. Specialised ventilation systems have also been undertaken. In addition to installation work, we offer a complete maintenance and repair facility. Direct turnkey projects, involving design anf supply, have also been undertaken.

Rectangular Ducting We supply rectangular ductwork and associated ductwork fabrications, in galvanised steel, mild steel, aluminium and stainless steel. Other special materials and finishes are available, along with a full range of fittings and ancillary components. Rectangular ducting is available in almost any size or shape.

Round Ducting We ensure that our spiral ducting is accurate in diameter and does not taper from end to end. Our ducting is ideal for HVAC applications and many others including: civil, textile and dust/ fume extractions. We manufacture standard components for every application, such as gored and die formed elbows, tees, laterals, reducers, transitions, pick-up hoods, access doors and many more.

Key Products

Our key product are sheet metal fabricated item as follows:

HVAC Accessories

HVAC accessories. Lite engineered items from Steel.

Rectangular Ducting

Rectangular ducting. Galvanized , stainless steel and mild steel. Welded Ducting and Fittings

Spiral Ducting

Spiral/Rolled ducting. Galvanized , stainless steel and mild steel. Welded Ducting and Fittings.

Canopies & Hoods

Kitchen Canopies and Hoods –Stainless Steel and Galvanized.
